Elevator pitch

Why?

The world of work is shifting faster than ever. HR leaders must engage and retain their people, close skills gaps, and respond to constant economic and organisational change — all while keeping costs down and delivering measurable business impact. At the same time, employees expect meaningful, personalised experiences, flexible ways of working, and clarity around growth, wellbeing and fairness.
To succeed, HR needs capacity, connected systems, and trusted insights to drive the people agenda with confidence and agility.

How?

Sage People enables mid-size, global organisations to transform how they attract, manage, pay, and engage their workforce — all through a single, highly flexible cloud HR and Payroll solution.
Built on Salesforce, Sage People provides enterprise-grade security, global reliability, and the ability to adapt quickly through configurable workflows, policies, and automation. Embedded AI accelerates hiring, surfaces predictive insights, reduces admin, and augments everyday tasks for HR, managers, and employees.
By unifying HR and Payroll data, Sage People removes friction and complexity, giving leaders instant visibility, enabling compliance, and empowering HR to drive workforce performance and wellbeing at scale.

What?

Sage People is a global, configurable HR & Payroll platform that automates the way organisations work today — and flexes for the way they'll work tomorrow. It empowers HR teams with connected people and payroll data, intelligent analytics, and powerful AI that supports better decision-making across the employee lifecycle.
From hiring and onboarding to performance, pay, engagement and workforce planning, Sage People delivers a seamless, consumer-grade experience that helps organisations reduce admin, boost productivity, elevate employee experiences, and build a high-performing, resilient global workforce ready for the future.

Sage People Vision and Offering

SAGE PEOPLE VISION

To be the world's most trusted intelligent People platform — helping organisations make better workforce decisions, powered by responsible AI.

SAGE PEOPLE MISSION

To empower HR leaders and organisations with trusted data, intelligent automation, and responsible AI — enabling confident workforce decisions, global consistency, and measurable business impact.

SAGE PEOPLE STRATEGY

Evolve from a HCM system to an **AI-powered intelligent people platform.** By combining AI innovation with the power of strategic partnerships and integrations, we'll deliver more value, reach more customers, and grow stronger

OFFERING

Sage People is a highly configurable, global HR platform that helps organisations turn people strategy into measurable business impact. Built on Salesforce, it brings together trusted workforce data, intelligent automation, and AI-assisted insight to reduce administrative burden, improve decision-making, and enable consistent global operations with local flexibility. Sage People supports how organisations work today—while giving HR the control, intelligence, and adaptability to evolve with confidence as the world of work continues to change.

FOR

Mid-sized (500–2,500 employees) global or multi-locational organizations in service or knowledge-based industries

Customer Value Proposition | Value messaging

CREATE PERSONALISED EXPERIENCES

Key challenges

1. Bringing the firms culture and purpose to life with a remote, hybrid and increasingly geographically spread global workforce – ensuring teams feel connected to the firm's purpose and included even when across borders
2. Poor employee experiences resulting in inability to improve engagement and productivity levels (e.g. unable to self-serve and find key information)
3. Lack of understanding of how employees feel and what they think, so unable to respond and course correct in real time
4. Attracting and retaining quality talent with the right skills in order to support the business in a rapidly evolving and competitive environment

Desired outcome

Deliver meaningful, personalized experiences throughout the employee journey, and create bespoke wellbeing resources to keep people happy, well and productive

How Sage People helps

1. Connect your teams digitally across borders and bring your culture and purpose to life
2. Create great experiences for a hybrid workforce with employee wellbeing at the center, through personalised experiences, self-service, two-way communications, AI-guided performance management, recognition tools and more
3. An intelligent HR assistant and guided workflows help employees and managers get answers and take action faster
4. Understand employee experience and sentiment in real time with flexible pulse surveys, continuous conversations tools and data driven insights
5. A visually appealing, personalised communications and self-service portal removes friction and empowers productivity
6. Find and hire quality talent 66% faster and reduce attrition by 5% with an end to end people management system

Capabilities

- Personalised, branded employee self-service portal accessible from any location and any device, 24/7.
- Targeted communications to specific groups and teams
- Employees can access important details such as their pay information, company policies or compliance requirements, as well as book leave and manage requests—from home, in the office, or anywhere else
- Customisable surveys create two-way communication and provide immediate feedback from employees
- Award instant peer recognition that is publicly visible

Proof points

Enigma Industrial Services: 75% time saving by enabling managers to access HR information
Trustpilot: Surveyed employees to see how they felt about remote working
Youth Dynamics: 4x increase in survey frequency, while boosting response rate 2x
Shawbrook Bank: 90% employees surveyed positive and confident with the system
Youth Dynamics: 66% accelerated hiring decisions

Customer Value Proposition | Value messaging

ATTRACT, DEVELOP AND REDEPLOY TOP TALENT

Key challenges

1. Organisations struggle to compete for scarce skills in a highly competitive job market
2. Slow, manual, or inconsistent hiring processes reduce hiring velocity and frustrate candidates
3. Employer experiences often fail to stand out or reflect culture across regions.
4. Bias in screening and inconsistent candidate evaluation leads to poor hiring outcomes
5. Disconnected systems cause duplicated effort, lack of visibility, and delays in progressing candidates.

Desired outcome

Find and reach high quality talent and improve speed, quality and cost of hiring

How Sage People helps

1. AI-powered matching & decisioning: find qualified candidates fast with AI-driven anonymous matching that removes bias, scores applicants, and accelerates hiring.
2. Immersive, branded candidate and onboarding experiences convert interest into commitment: create differentiated career portals using configurable branding, rich media, and guided, mobile-friendly application flows.
3. Flexible workflows and assessment stages: configure recruitment steps, automate screening, and manage applicants at scale with full ATS capabilities
4. Integrated scheduling & collaboration: streamline interview scheduling with Outlook integration and keep all communications centralised.
5. Seamless preboarding & onboarding: transition candidates to new hires through automated tasks, e-forms, and self-service—driving faster engagement.
6. Insights for continuous improvement: use real-time analytics and dashboards to evaluate pipeline health, hiring velocity, skills gaps, readiness and redeployment opportunities across the workforce.

Capabilities

- AI-powered candidate matching & scoring Anonymous shortlisting to reduce bias
- Fully configurable employer-branded careers portal
- Mobile-optimised application flows
- Configurable screening, selection criteria & assessment stages
- End-to-end candidate tracking
- Outlook interview scheduling integration
- Automated preboarding & onboarding workflows Real-time dashboards and compliance reporting

Proof points

Youth Dynamics: 66% faster hiring decisions
Westcon-Comstor: 50% reduction in cost-per-hire
TEI study: £828k saved due to recruiting and onboarding efficiencies
Trustpilot: Saved 10,000 hours in four months using Sage People for onboarding.
MCC: Ability to target skills more accurately and hire the right people faster.

Customer Value Proposition | Value messaging

DELIVER POWERFUL PEOPLE ANALYTICS

Key challenges

1. HR teams lack timely, accurate, and actionable insight to guide strategic workforce decisions.
2. Data is fragmented across multiple systems, preventing a single, trusted view of the workforce.
3. Manual reporting drains HR time and delays decisions for business leaders.
4. Limited ability to forecast trends such as attrition, hiring velocity, burnout risk, and skills gaps.
5. Leaders need stronger visibility into cost, performance, and workforce productivity to navigate change.

Desired outcome

Real-time, predictive intelligence from a single, trusted source of truth, enabling fast, confident, data-driven decisions that proactively optimise workforce performance and reduce people-related risk

How Sage People helps

1. Workforce Intelligence powered by CRM Analytics Plus gives HR advanced, predictive analytics with enterprise-grade statistical modelling— surfacing insights on attrition, performance, hiring velocity, skills gaps, and workforce health.
2. Intelligent dashboards convert complex workforce data into clear, actionable insights for leaders across HR, Finance, and Operations.
3. Real-time, unified people & payroll data eliminates manual consolidation and ensures decisions are made using the most accurate and up-to-date information.
4. AI-powered leading indicators automatically highlight emerging risks and opportunities — enabling fast, strategic intervention.
5. Configurable analytics views allow HR to tailor dashboards by region, entity, manager, or business function, supporting better cross-functional alignment.
6. Drill-down Analytics help identify root cause quickly, enabling proactive action rather than reactive firefighting.

Capabilities

- Workforce Intelligence with advanced predictive insights (powered by Salesforce CRM Analytics Plus).
- Real-time dashboards for attrition, hiring velocity, headcount, performance, and skills. Automated statistical analysis to uncover trends and anomalies.
- Configurable reports and analytics tailored to HR, Finance, and operational leaders. Unified HR & Payroll data for accurate, end-to-end visibility.
- Drill-down exploration and root-cause analytics. Secure, enterprise-grade analytics infrastructure on Salesforce.

Proof points

Youth Dynamics: 75% faster time-to-insight for annual HR data review
Spencer Ogden: Instant reports and dashboards means what used to take days now takes seconds
Smartstream: It takes just 20 minutes to half an hour to provide reports whilst it used to take a day and a half to two days to pull it together before (reduction of 96%)
Domino Printing Sciences: Provides more visibility, so HR no longer feels like a walled-off fortress
ChildFund: Has global visibility spanning all 22 countries they operate in, without requiring IT intervention
TEI study: £116k saved in reporting efficiencies

Sage

Customer Value Proposition | Value messaging

REDUCE ADMIN AND DRIVE PRODUCTIVITY

Key challenges

1. HR consumed with simple, low value admin tasks so unable to add strategic value, drive change and focus on their people
2. HR spend too much time on outdated, manual processes which cost the business in accuracy and time
3. People data spread across multiple and disparate systems / spreadsheets with no single source of truth

Desired outcome

Less time on admin, more time driving the people agenda and adding more strategic business value

How Sage People helps

1. AI-assisted automation and guided approvals reduce manual effort and errors
2. AI-guided performance management elevates performance and efficiency
3. Easily perform HR tasks in the flow of work in Microsoft Teams
4. An intelligent HR assistant delivers instant, personalized answers with multilingual support, and smart escalation.
5. Enable HR, managers, and employees to self-serve confidently through intuitive experiences and embedded guidance
6. Reclaim capacity and focus effort where it drives the greatest impact
7. Reduce admin tasks by up to 40%, enabling HR teams to focus on adding strategic value and building great workforce experiences
8. Streamline day to day tasks, resulting in >99% accuracy, saving up to 50% in key HR costs and connect your teams digitally with a trusted, secure and accessible system so your business can flow at the speed of now
9. Consolidate all your people data into one, single source of the truth to manage your global workforce more effectively

Capabilities

- Microsoft Teams integration enables HR tasks to be performed in the flow of work without switching applications
- Automatic workflows and approvals reduces the time to complete workforce-related changes and improves productivity.
- Personal information can be maintained, and HR admin tasks completed, at any time from any device.
- Audit trail of salary, bonus, commission and other information retained for each employee.
- Easily manage bulk updates, for example, when moving groups to new managers as a result of restructuring.
- Easy integration to payroll and other third party applications

Proof points

Channel 4: Replaced nine separate systems
Lovehoney: Can now pick up strategic activity, without employing extra heads
Westcon-Comstor: Moved from multiple complex systems across the globe to one, single source of truth
Spencer Ogden: 40% decrease in admin time for HR MUFG: 50% increased productivity in HR teams
Enigma Industrial Services: 65% decrease in pay review admin resulting in 99.7% accuracy
Westcon-Comstor: 50% reduction in cost per hire
ChildFund: By automating manual tasks, team improved efficiency by 20%
TRIO: Scaled the workforce by 40% while effectively supporting employees with remote working

Sage

Customer Value Proposition | Value messaging

EMPOWER HR WITH GLOBAL CONTROL & COMPLIANCE

Key challenges

1. Managing disparate HR processes and inconsistent policies across multiple countries, entities, or business units creates compliance risk and operational inefficiency.
2. HR teams rely on manual workarounds or separate systems, making it difficult to maintain a single source of truth for people data and governance.
3. Local regulatory requirements change frequently, and HR lacks the flexibility to adapt processes quickly without IT or external consultants.
4. Visibility into global workforce costs, headcount, and structures is fragmented, slowing strategic planning and decision-making.

Desired outcome

To give HR a unified, configurable system that standardises global policies while flexing for local needs, ensuring accurate data, consistent governance, and fast adaptation to organisational or regulatory change

How Sage People helps

1. One global system of record provides a single, trusted source of truth across all entities, regions, and business units — simplifying governance and improving accuracy.
2. Highly configurable workflows and policies (click-not-code) allow HR to own and adapt processes quickly without depending on IT or external teams.
3. Global frameworks with local variation let HR embed enterprise-wide standards while supporting local compliance rules, legislation, working patterns, leave types, pay structures, and regional processes.
4. Protects sensitive people data with enterprise-grade security, role-based access, user profiles, and configurable data-retention policies
5. Maintains governance, auditability, and trust at scale on a secure, global Salesforce platform
6. Unified HR & Payroll data ensures consistent, accurate information across the organisation and supports compliant pay, reporting, and governance.
7. Automation of routine tasks (approvals, job changes, contracts, compensation cycles, documentation) reduces administrative load and improves accuracy.
8. Real-time visibility into headcount, cost, structures, and workforce changes enables faster, data-driven decisions at global and local levels.

Capabilities

- Global policies with configurable local variations
- Multi-entity, multi-country, multi-currency management
- Click-not-code workflow builder for HR-owned changes
- Configurable compliance rules by country, region, or entity
- Unified HR & Payroll data for consistent governance
- Bulk updates, automated workflows, approvals
- Organisational structures, job architecture, and role permissions
- Real-time reporting and dashboards for global and local insight

Proof points

Sage

ChildFund: Gained global visibility across 22 countries without IT involvement.
Westcon-Comstor: Centralised global people data, improving strategic budgeting and workforce planning.
Spencer Ogden: 40% reduction in admin time; able to scale globally with consistent processes.
TRIO: Scaled workforce by 40% while maintaining consistent people processes during rapid growth.

Customer Value Proposition | Value messaging

UNIFY HR AND PAYROLL DATA

Key challenges

1. Payroll teams spend too much time chasing data, correcting errors, and reconciling inputs from multiple sources.
2. Manual processes increase the risk of inaccuracies, compliance issues, and payment delays.
3. Disconnected HR and Payroll systems make forecasting, reporting, and cost control difficult.
4. Changing legislation and complex scenarios (e.g., pay rules, GPG, TUPE, benefits, industry-specific rules) are hard to manage consistently across the organisation.

Desired outcome

To automate and streamline payroll processes so employees are paid accurately and on time, while giving HR and Payroll a unified, compliant, and data-driven foundation for confident decision-making.

How Sage People Payroll helps

1. One unified HR & Payroll dataset ensures consistency, accuracy, and compliance across the full employee lifecycle.
2. Configurable pay rules, policies, and workflows support organisational structures, cost centres, job roles, and country-specific requirements.
3. Automation of inputs and approvals removes rekeying, eliminates duplication, and validates data before it reaches payroll.
4. Batch processing enables efficient updates, corrections, and period-end tasks across large or complex employee groups.
5. Proactive compliance alerts surface issues such as age-related changes, legislation updates, and non-compliant actions before they cause errors.
6. Comprehensive reporting and forecasting gives Payroll and Finance clear visibility into costs, scenarios, and future impacts.

Capabilities

- Multi-entity and multi-company payroll management
- Customisable pay conditions, deductions, and legislative rules
- Automated data collection and approvals from managers, employees, and external providers
- Batch processing and bulk updates Workflow support for salary changes, reviews, and payroll-related HR outcomes
- Advanced reporting for budgeting, forecasting, job costing, and compliance

Proof points

- Urban Pubs scaled confidently from 3 to 57 sites with Sage People Payroll, supported by flexible licensing that grew seamlessly with every new location
- Replaced manual effort with fast, disruption-free payroll runs, ensuring teams experienced a smooth transition with no impact on day-to-day operations.
- Achieved dramatic efficiency improvements — payslips that previously took an entire afternoon can now be sent “at the click of a button.”
- Gained comprehensive reporting capabilities that handled complex pay scenarios better than alternative systems, reinforcing their confidence in Sage People Payroll.
- Successfully centralised payroll for 1,200+ staff across variable hours, weekly/monthly pay runs, and seasonal spikes — all while keeping payroll fully in-house

Sage

What sets us apart

Global HR and People system for mid-sized multinationals built on Salesforce, automating the end-to-end employee journey so HR can reclaim capacity and drive the people agenda

Single source of truth delivering instant access to people data for a complete and accurate view of your global workforce, with intelligent, predictive reporting capabilities to drive actionable insights

Highly configurable - designed for organisations where configuration is a governance decision — not a UI preference. Quick to implement, short time to value, enabling a level of flexibility that few mid-market solutions provide

Great personalized experiences across the end-to-end employee journey, from hiring and onboarding to performance management and ongoing wellbeing capabilities while employer branded experiences bring your culture and purpose to life

Enterprise grade capabilities for the mid-market, on a trusted, secure, accessible Salesforce platform where AI-assisted automation and insights are grounded in consistent global data structures, ensuring fairness, compliance, and defensible outcomes across regions.

Proven ability to deliver projects successfully and grow with the customer, supported by a dedicated centre of excellence for developing best practices and a premium, high-touch success model

Sage People messaging on-a-slide

Sage People: enabling HR to build a high-performing global workforce that's fit for the future - through intelligent people analytics and highly flexible and configurable talent management

Context: Economic pressure, skills shortages, regulatory scrutiny, and AI adoption are reshaping the role of HR from service delivery to performance leadership. HR leaders in larger organisations are now expected to deliver measurable productivity, fairness, and resilience — with less capacity, greater complexity, and higher accountability than ever before.

Boilerplate: shorter
Sage People is a highly configurable, AI-powered HR solution that helps global organisations remove friction, unlock capacity and turn people strategy into measurable business outcomes. Built on Salesforce, it's enterprise-grade configurability empowers HR to build a high-performing, global workforce that can handle future changes and stay ahead of the competition.

Boilerplate: longer
Sage People is a highly configurable, AI-powered HR platform built on Salesforce, designed for mid-size and large global organisations. It brings together AI-assisted workflows, predictive workforce intelligence and Payroll into a single system of record — enabling HR, managers, and leaders to automate low-value work, gain real-time insight, make explainable people decisions, and intervene earlier across performance, wellbeing, skills, and pay. By unifying data, embedding responsible AI, and enabling HR-led configuration, Sage People helps organisations adapt faster, govern with confidence, and sustain high performance - even during times of change, fast growth or uncertainty.

- Need: adopt AI responsibly to reduce low value HR tasks, admin and costs
- Need: real-time, predictive insights and analytics
- Need: attract, retain and redeploy in-demand talent and skills
- Need: optimise productivity and performance
- Need: keep employees happy, well and engaged
- Need: redesign how work gets done
- Need: standardise globally while flexing locally as the business scales

Key messages

Automate end-to-end HR and People processes with explainable human-controlled AI

Improve HR productivity by 50%, reduce errors and manual processing, and unlock 8 FTE's of capacity through automation and tech stack consolidation

Provide global workforce visibility and insights
Gain visibility of the entire workforce through intelligent, predictive people analytics, enabling impactful, actionable insights so HR leads with evidence, not hindsight.

Attract, retain and redeploy top talent

Remove bias with intelligent candidate matching, design differentiated employer branded experiences, identify and close skills gaps and accelerate hiring decisions by 66%

Deliver measurable workforce productivity – not just activity

Increase employee productivity through effective performance management and accessible self service. Reclaim leadership capacity through performance review AI automation and time savings

Design exceptional employee experiences
Deliver meaningful, personalised experiences across the employee journey — with intelligent automation to support continuous growth, resilience, and productivity, helping people stay happy, well, and focused on high-value work.

Redesign work continuously as priorities change
Design and test new ways of working with a highly configurable system that provides real time employee feedback. Connect your teams digitally across borders and bring your culture and purpose to life on a trusted, secure and accessible system

One system for your entire global workforce
Standardise with confidence, flex with speed and govern at scale. Embed global policies and processes across your entire business while allowing for local regulations, using best practices supported by our centre of excellence. Save £402k through system consolidation

152% ROI

#1 HR system built on Salesforce

£1.5m In efficiency savings

33% reduction in time-to-hire

40% reduction in HR admin

22 currencies and more than 60 countries supported

~350,000+ end users across 160+ countries

Sage People | Customer Challenges and Benefits

	Customer challenges	Triggers	Benefits	Customer proof points
Create amazing hybrid experiences	1. HR is expected to deliver engagement, productivity, wellbeing and retention — but lacks visibility into what employees actually experience day-to-day. 2. Employee experience is fragmented across systems, regions, and roles, leading to inconsistent journeys, low adoption, and disengagement. 3. Managers are overloaded and act as the bottleneck for experience, feedback, performance and wellbeing — without real-time insight or guidance. 4. HR struggles to prove the impact of experience initiatives on performance, retention and productivity.	1. Shift to hybrid and distributed work, exposing cracks in culture, communication and manager capability. 2. High employee churn rate 3. Rising workload, burnout and attrition signals (particularly among managers and HR teams). 4. Increased executive pressure to show measurable outcomes, not engagement scores alone. 5. New expectations that AI should remove friction, not add complexity. 6. Workforce scaling	1. Personalised, AI-assisted experiences that adapt to role, location and lifecycle stage — reducing friction and improving day-to-day productivity. 2. Intelligent self-service and AI HR assistants provide instant, contextual answers and guided actions, reducing reliance on HR and managers. 3. AI-guided performance and feedback helps managers coach consistently and fairly 4. Experience signals connected to performance and wellbeing data, enabling HR to intervene earlier — before disengagement or burnout lead to attrition. 5. A single, engaging Workforce Experience layer that turns EX into a productivity lever, not a standalone initiative.	Enigma Industrial Services: 75% time saving by enabling managers to access HR information Trustpilot: Surveyed employees to see how they felt about remote working and how they should return to offices post-pandemic Youth Dynamics: 4x increase in survey frequency, while boosting response rate 2x Shawbrook Bank: 90% employees surveyed positive and confident with the system Youth Dynamics: 66% accelerated hiring decisions Trustpilot: Saved 10,000 hours in four months through improved onboarding and employee experience.
Reduce admin and drive productivity	1. HR capacity is consumed by low-value admin, approvals and data corrections. 2. Managers are frustrated by fragmented processes, multiple systems and inconsistent guidance. 3. Productivity losses are hidden inside manual work, duplicated effort and system sprawl. 4. AI adoption pressure exists — but HR is accountable for accuracy, trust and outcomes 5. Optimising skills and capabilities and rethinking how work gets done due to the advent of hybrid working and AI-assistance	1. Multiple, unmanageable systems with conflicting data Workforce growth, acquisitions, or regional expansion creating scale pressure. 2. Shrinking HR teams expected to deliver more impact with fewer resources. 3. Rising HR ticket volumes and manager dependency. 4. Executive focus on ROI, efficiency and measurable productivity gains. 5. Skills shortages impacting business operations, the ability to scale and grow or the customer experience	1. Consolidate all your people data into one, single source of the truth to manage your global workforce more effectively 2. AI-assisted workflows automate routine HR and people processes end-to-end, removing manual effort and reducing errors. 3. Intelligent HR assistants deflect queries and guide actions reducing HR ticket volume and reliance 4. AI-guided performance reviews and approvals reclaim manager time while improving consistency and quality 5. HR, managers and employees all regain capacity — without increasing headcount or burnout 6. Productivity gains are measurable, repeatable and defensible, not anecdotal. 7. Understand the skills and talent profile across your organisation and create plans to fill skills gaps while optimising ways of working through sophisticated performance management, succession planning and feedback tools and reports	Channel 4: Replaced nine separate systems Lovehoney: Can now pick up strategic activity, without employing extra heads Westcon-Comstor: Moved from multiple complex systems across the globe to one, single source of truth Spencer Ogden: 40% decrease in admin time for HR MUFG: 50% increased productivity in HR teams Enigma Industrial Services: 65% decrease in pay review admin resulting in 99.7% accuracy Westcon-Comstor: 50% reduction in cost per hire ChildFund: By automating manual tasks, team improved efficiency by 20% TRIO: Scaled the workforce by 40% while effectively supporting employees through COVID-19 Forrester TEI: • ~8 FTEs of capacity unlocked across HR, managers and IT • 35% reduction in HR ticket volume • 152% ROI with a 7-month payback period • £1.5m saved with 80% due to recruitment and onboarding and technology consolidation

Sage People | Customer Challenges and Benefits

	Customer challenges	Triggers	Benefits	Customer proof points
Deliver powerful, actionable people insights	1. HR credibility is undermined by lagging, manual and inconsistent reporting across multiple systems. 2. Leaders expect forward-looking answers — but HR is stuck explaining the past. 3. Workforce risks (attrition, burnout, skills gaps, productivity drop-offs) are identified too late to act meaningfully. 4. HR teams spend disproportionate time producing reports instead of influencing decisions.	1. Workforce scaling so manual reporting is no longer sustainable 2. Economic pressure forcing tighter workforce cost control and productivity scrutiny. 3. Boards and executives demanding evidence-based decisions, not intuition. 4. Growing complexity across regions, entities and roles — making spreadsheets unworkable. 5. Rising expectation that AI should deliver prediction and decision support, not dashboards.	1. Workforce Intelligence with predictive analytics surfaces leading indicators for attrition, performance, skills and capacity risk. 2. AI-driven insights highlight what matters most, automatically prioritising risks and opportunities for HR and leaders. 3. HR moves from reporting to decision support, with scenario modelling and drill-down insight by role, region or manager. 4. HR gains authority by leading with evidence, foresight and confidence — not hindsight. 5. Reduce time to insight by 75%, going from days or weeks of gathering insight to just minutes	Youth Dynamics: 75% faster time-to-insight for annual HR data review Spencer Ogden: Instant reports and dashboards means what used to take days now takes seconds Smartstream: It takes just 20 minutes to half an hour to provide reports whilst it used to take a day and a half to two days to pull it together before (reduction of 96%) Domino Printing Sciences: Provides more visibility, so HR no longer feels like a walled-off fortress ChildFund: Has global visibility spanning all 22 countries they operate in, without requiring IT intervention
Empower HR with global control and compliance	1. Managing people data, policies, and processes across multiple countries, entities, and business units creates operational friction and compliance risk 2. Fragmented systems and local workarounds undermine governance, auditability, and trust in HR data 3. HR teams rely on IT or external consultants to adapt policies, workflows, and structures — slowing response to change 4. Local regulatory changes require fast adaptation, but rigid systems make updates slow and risky 5. Leaders lack real-time visibility into global headcount, structures, and workforce cost 6. Security, access control, and data-retention obligations increase risk exposure as organisations scale globally	1. Rapid international expansion or entry into new countries 2. Mergers, acquisitions, or divestments creating multiple entities and policies 3. Increased regulatory scrutiny (e.g. GDPR, local labour laws, data residency requirements) 4. Workforce growth reaching a tipping point where spreadsheets and local tools no longer scale 5. Executive pressure to improve governance, consistency, and confidence in people data	1. One global system of record that standardises core HR processes while flexing locally 2. HR-owned, click-not-code configuration enables fast adaptation without IT dependency 3. Reduced compliance risk through consistent governance, audit trails, and role-based access 4. Faster response to organisational or regulatory change 5. Improved confidence in global reporting, workforce planning, and decision-making 6. Secure, enterprise-grade platform that protects sensitive people data at scale	ChildFund: Achieved global visibility across 22 countries without IT involvement Westcon-Comstor: Centralised global HR data, improving governance and strategic workforce planning Spencer Ogden: Reduced HR admin time by 40% while scaling internationally with consistent processes TRIO: Scaled workforce by 40% during rapid growth while maintaining compliant, consistent people processes

Sage People Payroll messaging on-a-slide

Sage People Payroll: Sage People Payroll is a modern, scalable, cloud payroll platform for growing organisations that need absolute accuracy, flexibility, and confidence — even as complexity increases.

Context: Research shows that payroll is now one of the most critical "moments that matter" in the employee experience, because it is the most frequent and trust-defining interactions employees have with their employer. As employee expectations shift toward consumer-grade digital experiences, accurate, transparent, and accessible pay is no longer a hygiene factor but a baseline expectation. As a result, payroll teams are increasingly on the front line of employee experience, not just compliance and processing.

Boilerplate: shorter Sage People Payroll is a scalable, cloud payroll solution built for growing organisations with complex pay needs. It delivers accurate, compliant payroll at speed — with flexible licensing, powerful reporting, and disruption-free implementation, even as your business grows

Boilerplate: longer Sage People Payroll is a modern, cloud payroll solution designed for organisations that are growing, changing, and operating at scale. It supports complex, multi-site payrolls with variable hours, mixed pay cycles, and seasonal staffing — while keeping payroll firmly in-house. With flexible licensing, comprehensive reporting, and fast, disruption-free rollouts, Sage People Payroll gives payroll teams the confidence, control, and accuracy they need to keep pace with the business — without slowing it down.

- Need: Absolute payroll accuracy at scale
- Need: Confidence payroll won't stall as the business grows
- Need: Support for complex, variable pay patterns
- Need: Minimal disruption during change or rollout
- Need: Clear, reliable payroll reporting
- Need: Flexible licensing that grows with the organisation
- Need: Strong vendor partnership and responsive support

Key messages

Get payroll accuracy you don't have to double-check

Process payslips at the click of a button, and schedule whole pay-runs in advance removing hours of manual processing per run.

Scale up confidently every time you grow

A powerful, robust processing engine processes thousands of payslips in minutes

Handle real-world payroll complexity with ease

Sage People Payroll supports weekly and monthly payrolls, seasonal hires, and week-to-week shift variation across thousands of staff

Implement payroll without disruption

Seamlessly deploy Sage People Payroll through our expert implementation partners who combine deep knowledge with controlled deployments, enabling payroll continuity and operational stability.

Confidently meet board and statutory reporting requirements

Sage People Payroll offers a robust reporting library, including pensions and P11D reporting, and meets complex requirements better than alternatives.

Get future-proof flexible licensing

Future-proof growth and handle mergers and acquisitions with ease due to flexible licensing and cost options over rigid, fixed models that hamper change and agility

Become a partner, not just a customer

Get direct access to a dedicated Success Manager with hands-on support throughout implementation and beyond

TRUST

25m employees paid through Sage globally

200m payslips uploaded to Payroll globally

Disruption-free implementation

Handles complexity and volume with ease

No-click payroll requires no human intervention...

...So you can focus on more complex payrolls

Urban Pubs scaled from 3 to 57 sites with ease

Sage People Win Highlights – FY26

Brabners

About: Brabners offer a wide range of legal services and represent an eclectic mix of clients — from multinational businesses and global brands to social enterprises and ambitious SMEs, as well as families, individuals, senior professionals, athletes and celebrities.

Challenges:
Hidden operational cost: Significant HR and People Partner time lost to manual processes, spreadsheets, and system workarounds rather than strategic work.
Poor usability and adoption: Clunky, unintuitive system (CIPHR) with low engagement from partners and managers.
Weak data and insight: No dashboards or reliable self-service reporting; basic questions (headcount, attrition, leavers) require manual effort and are slow to answer.
Manual, error-prone reporting: Board packs, reviews, and pay cycles rely heavily on spreadsheets, increasing risk, rework, and data-security concerns.
Fragmented HR tech: People data spread across multiple systems, with no single source of truth, driving inconsistency and reconciliation effort.
Inefficient onboarding and workflows: Multi-step, manual processes across HR, compliance, documents, and IT slow down hiring and create friction.

Reasons for selection:
Reporting & insight: dashboards, scheduled reporting, and point-in-time capability to underpin board packs and departmental review **Workflow automation:** replace manual processes with configurable workflows and approvals
Adoption enablement: modern UI, mobile access, and approvals/notifications in the flow of work
Workforce Intelligence: provides an analytics layer aligned to their longer-term "AI-enabled firm" direction **Integrations:** supports their need to connect HR to key systems (ATS, payroll, identity/SSO) and reduce fragmentation
Scalability: platform is positioned as configurable and future-proofed for continued growth and evolving People strategy

Partner: N/A

Multinational: No

Vertical: Law firm

Size: 580 employees

Previous HR system: CIPHR

Lindab

About: Lindab is a leading ventilation company, offering solutions for energy-efficient ventilation and a healthy indoor climate in Europe. The products are characterised by high quality, ease of installation and environmental thinking. In northern Europe, Lindab also has an extensive range of roof, wall and rainwater systems.

Challenges: Lindab Needed to unify HR across a rapidly growing, acquisitive business. Lindab's HR was fragmented (using Catalyst One for performance, separate tools for learning, etc.) and leadership aimed to **digitalize all core people processes and establish a single source of truth** for HR data company-wide. Sage People was chosen for its strong **global capabilities**, ability to cover end-to-end HR (recruitment, onboarding, talent, analytics) in one flexible system, and quick deployment. It addressed Lindab's challenges by **standardizing HR processes across 20 countries** and supporting future growth.

Reasons for selection: Sage People's **Salesforce platform** (providing reliability and easy integration), high configurability (click-not-code setup), and proven success with multinational organisations set Sage People apart from competitors, enabling Lindab to modernize HR on a unified platform.

Partner: N/A

Multinational: Yes

Vertical: Manufacturing

Size: 5000 employees

Previous HR system: Catalyst One

Dyninno

About: Dyninno is a group of companies providing products and services in the travel, finance, entertainment, and technology sectors in 50+ countries

Challenges: Sought a scalable HR system to support aggressive global expansion. Dyninno faced the challenge of managing HR for dozens of brands across many countries while planning to **hire thousands of new staff in hubs like the Philippines**. They selected Sage People after extensive evaluations and phased trials, finding it best met their needs for **multi-country, multi-entity HR management**. Sage People provided **agility in implementation approach so can go live and replace SAP entirely** – Dyninno needed full control of the system going forward and not need external consultants which Sage People demonstrated so that the Dyninno team could see that they can configure and maintain the system themselves with ease of configurability of processes, flows and approvals

Reasons for selection: Sage People's **robust global functionality** (languages, local policies, multi-currency), combined with **Configurability** & **Integration flexibility** (open APIs to link with Dyninno's data lake and analytics tools) gave it an edge over competitors. Its ability to **deliver quick time-to-value** – getting Dyninno live and adding new countries quickly – and a single-vendor solution for HR across 50 countries were critical factors in the win

Partner: N/A

Multinational: Yes

Vertical: Business Services

Size: 5000 employees

Previous HR system: SAP
