How Sage People solves these key challenges

Theme	Performance and Productivity	Responsible AI	New ways of working	Skills shortages	Leadership and manager growth development	Wellbeing	Pay transparency and fairness
Challenges	• Rising workload and shrinking HR capacity • Too much time spent on low-value admin • Limited visibility into where productivity breaks down	• Pressure to adopt AI without losing trust or control • Lack of explainability in people decisions • Increased scrutiny from employees and regulators	• Hybrid complexity and inconsistent experiences • Difficulty scaling new operating models quickly • Rigid systems that slow change	• Skills gaps increasing faster than organisations can respond • Limited visibility into skills, capability, and readiness • Learning disconnected from real business needs	• Managers overloaded and under-supported • Inconsistent execution of HR strategy • Managers becoming the wellbeing and performance bottleneck	• Rising burnout and sustained pressure across HR and management • Poor visibility into workload, stress, and risk • Wellbeing treated as a programme, not a performance lever	• Growing regulatory and reputational risk • Fragmented HR and payroll data • Limited confidence in pay equity and governance
How Sage People helps solve these challenges	• AI-assisted workflows automate routine HR and people processes end-to-end • Embedded analytics surface productivity risks, bottlenecks, and trends early • Managers and HR get real-time insight to focus effort where it drives impact ****COMING SOON**** **Sage People AI - Performance Coach and Ask HR**	• Explainable, human-controlled AI embedded across HR, analytics, payroll, and learning • Clear governance, audit trails, and decision transparency • AI that augments human judgement and productivity — not replaces it	• Highly configurable, click-not-code workflows owned by HR • Rapid experimentation with policies, processes, and ways of working • One global system with local flexibility, built on Salesforce	• AI-powered insight into skills gaps and workforce capability • **Uptime** delivers personalised, mobile-first learning in the flow of work • Continuous upskilling that supports productivity, redeployment, and resilience	• Manager-ready insights, guidance, and workflows embedded in daily work • Clear visibility into team performance, workload, and risk • Tools that enable managers to lead effectively without increasing complexity and admin burden	• Data-led insight into workload, absence, and wellbeing indicators • Uptime supports learning, wellbeing, and resilience at scale • Early intervention before burnout leads to attrition or disengagement	• Unified HR & People Payroll data creates one source of truth • AI-supported checks, alerts, and reporting improve compliance and accuracy • Trusted insight enables confident, defensible pay decisions • Robust processing engine support complex, high volume, multi-entity processing

Sage People brings together global HR and UKI Payroll on one intelligent platform – so global organisations can scale performance, productivity, resilience and decision-making with confidence

Sage People Product Capabilities

AI-powered reporting and people analytics

Advanced analytics enhanced with AI-powered insights help HR make faster, data-driven people decisions. Workforce Intelligence automatically surfaces trends, predicts risks such as attrition or skills gaps, and provides actionable insights using trusted, secure Salesforce analytics.

Talent acquisition

Find and hire the best people, faster with intelligent, anonymous candidate matching that automatically removes bias and assesses job fit. Automate key processes for a smoother and more consistent candidate experience. Reach targeted talent quickly and ensure seamless onboarding experiences both in the office and remotely.

People management

Manage your entire workforce from one secure system of record, with AI-assisted workflows that automate routine changes, highlight exceptions, and reduce manual effort. Configurable processes evolve as your business grows, freeing HR to focus on strategic impact.

Attendance and leave

Get a complete, real-time view of global attendance and absence, with intelligent insights that help identify emerging patterns and potential risks. AI-supported reporting enables proactive workforce management across regions and entities

Reward planning

Plan and manage reward cycles with guided workflows and AI-supported checks that improve accuracy and governance. Unified HR and Payroll data helps ensure compliant, confident compensation decisions at scale.

Performance and talent

Identify future leaders, close skills gaps, and develop talent with continuous feedback and AI-enhanced insights. Connect performance, skills, and development data to support smarter workforce planning and better business outcomes.

Global cloud HR and People platform

Built on Salesforce, Sage People delivers enterprise-grade security, reliability, and scalability, with an AI-ready platform designed for global operations. The Einstein Trust Layer ensures data privacy while enabling high-volume analytics and intelligent automation.

Experience and Communications

Deliver personalised employee experiences with intelligent self-service, communications, and feedback tools. AI-driven insights help HR understand sentiment, guide employees in the flow of work, and improve engagement across the employee journey.

Payroll

Sage People offers payroll in the UK and Ireland and integrates with other payroll solutions through a secure payroll connector. AI-powered checks, dashboards and proactive alerts in Sage People Payroll ensure compliant payroll processing at scale and our complete, unified solution enables your HR and Payroll data to flow seamlessly reducing errors, manual effort and compliance risk.

Learning and Wellbeing

Design wellbeing hubs and resources through click not code, and support lifelong learning and wellbeing through Uptime. Deliver personalised, mobile-first micro-learning, compliance training and wellbeing experiences at scale. AI-driven recommendations, narration, translation, and spaced repetition helps employees learn faster, retain knowledge longer, and focus on what matters most—without disrupting their day-to-day work.

Services – Customers for life

As an extension of your team, we're there from the start.

Our services team are made up of five key teams who are tightly integrated to support your journey with us from sales inquiry through to renewal and becoming a Customer for Life. For our customers, managing people means managing change. We have a strong emphasis on continuous, ongoing learning across all departments at Sage People, spearheaded by our Center of Excellence team to ensure we're providing the best customer experience and support possible. We're committed to outcome-driven guidance that boosts adoption, maximises ROI, and helps you achieve measurable business results and continuous optimisation through insights, best practices, and tailored success planning that keeps your organisation moving forward – even through times of change and uncertainty.

Partners

- Requirements analysis
- Implement and deploy solutions to fit business needs
- Enablement and adoption services

Centre of Excellence

- Define and evolve best practice and processes
- Enable partners and internal teams with repeatable patterns and expertise
- Champion voice of the customer roadmap requests

Expert services

- Deliver advanced configuration, integrations, and complex use cases
- Tackle scenarios that require deep product and domain expertise
- Specialist support and guidance beyond standard delivery

Customer Success

- Dedicated Success Managers
- Help maximise value extraction and product adoption
- Premium, consistent, high touch model

Support

- Global, follow the sun support
- Self service resource, community and knowledgebase
- Fast access to product experts and practical guidance

We work as an extension of your team and your success is our mission

Sage People Customer feedback

"Sage People's customer success team continues to have a high-touch, brilliantly responsive approach to customer service."

HR Director, international currency services company

"The success of our implementation project was due to our implementation consultant. They exhausted every avenue to meet our requirements, we felt they went the extra mile."

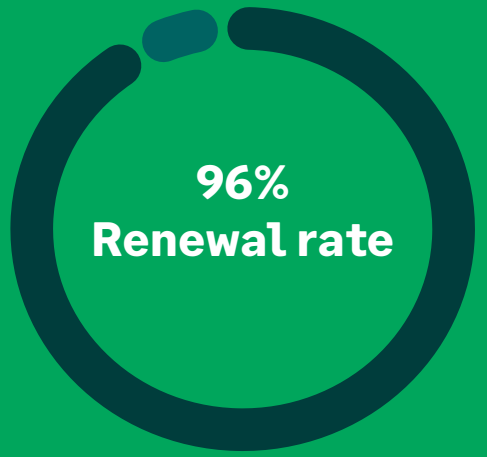
Emily O'Sullivan, Senior Solutions Specialist, TOMRA

"Quick response and clear instructions on steps to follow. Always a great support service."

Sue McMonagle, People Team Manager, Hawksford Group

"The team got to know our organization and priorities. We had some crazy scenarios and they worked hard to find solutions that were configurable and inexpensive."

Karen Grace-Pankratz, Director of Human Resources, MCC



We build a customer success plan for every customer that is designed around their strategy and objectives. We track agreed ROI metrics, system adoption and utilization and C-Sat scores.
