Product strategy and roadmap

Sage

Sage People 2-year Product Strategy

WHERE HUMAN POTENTIAL MEETS INTELLIGENT DESIGN

Accelerate Market Differentiation

Harness Salesforce's strengths to accelerate AI-powered innovation, reduce time-to-market and drive NCA.

Roadmap initiatives

Low code solutions
Launch 3 transformative low-code solutions, empowering HR teams to customize effortlessly, and unlock agility at scale

Sage People Copilot
Deliver breakthrough AI experiences with 3 fully agentic capabilities and 4 deeply embedded AI features

Grow Customer Lifetime Value

Drive ARR from the base, unlock customer value and improve retention through key product enhancements.

Roadmap initiatives

Exceptional UI: Powered by AI
Deliver 4 fully redesigned areas with cutting-edge UI that sets a new standard for simplicity, speed, and engagement

Customer-driven innovation
Deliver 40 impactful Voice of the Customer enhancements inspired by real-world customer needs

Enable the Ecosystem

Boost growth and expand product capabilities through deeper integrations and strategic partnerships.

Roadmap initiatives

Integration Marketplace
Deliver 30 new ISV partnerships with seamless, ready-to-use integrations, creating a powerful ecosystem that accelerates HR innovation

New SFTP Server migration
Achieve 70% adoption across the base, setting a new standard for reliability and performance

Rationalise the Product

Simplify features & tech stack, eliminate redundant code and minimise duplication to accelerate roadmap delivery.

Roadmap initiatives

EoL legacy features
Deprecate 4 outdated processes by the end of FY28, paving the way for a faster, smarter Sage People experience

EoL front-end libraries
Remove all front-end libraries but the latest one, unlocking agility and enabling next-gen design

Exceptional UI: Powered by AI

Coming in 2026

Performance Copilot

- Drafts operational and development OKRs from role context, reviews, or prompts
- Flags weak key results & suggests improvements
- Creates feedback requests from scratch or checks employee-crafted ones for specificity
- Summarises multiple performance data-points into clear narratives
- Generates performance snapshots highlighting strengths and improvement areas
- Refines tone in feedback and reviews; detects and corrects bias
- Sends nudges for objectives and review deadlines
- Identifies and flags OKR misalignment, and suggests corrections

Org Chart

- A brand-new Org Chart UI & UX, consistent with the rest of WX 2.0 and the Sage Design System
- A fully responsive & accessible experience for employees accessing the Org Chart
- Makes reporting hierarchies, dotted lines and team structures instantly visible to employees
- Enables customisable views by collapsing colleagues or hierarchies when not needed
- Allows excluding certain employment types or employees for confidentiality or relevance
- Provides advanced exporting options for use in in 3rd party tools
- *(FY27) Supports "what-if" scenarios to visualise strategic workforce planning*

AskHR Agent

- Empowers employees with instant, personalised answers
- Surfaces country- and location-specific policy details with source links
- Retrieves personalised facts (e.g., eligibility, accruals, balances) from system records
- Escalates complex or edge-case queries to HR admins with a prefilled context summary
- Logs all interactions and auto-tags themes to help identify content gaps
- Provides explainable answers with citations to trusted sources and auditable trails
- Supports multilingual queries and normalises intent (e.g., maternity leave vs parental leave)

Next highest priority

Hiring Copilot

- Drafts vacancy briefs from existing job descriptions or similar vacancies, keeping neutral, unbiased language
- Produces interview kits with structured questions, scorecards aligned to job briefs
- Follows up on next steps with reminders, e.g. to move candidates to next stage
- Summarises internal candidate data & history for hiring manager review
- Recommends open roles to interested internal candidates based on skills and role context
- Provides interview preparation with data from the employee's records, aligned to the job brief
- Orchestrates application steps with relevant nudges and guidance

Navigation Copilot

- Provides conversational navigation to the processes the employee has access to
- Offers shortcuts to frequently used processes or sections within processes
- Routes the employee to the right colleague's profile with deep links to initiate actions
- Lists outstanding actions or approvals and provides instant paths to complete them
- Enforces user-based access so that employees only see info relevant to them
- Resolves "how do I..?" queries with step-by-step guided flows and direct links
- Handles simple transactional requests like amending or adding profile-type details

NEW Onboarding

- Onboarders receive a personalised onboarding plan tailored to their role and team context
- Accesses summarised guides for key company policies and procedures
- Views progress snapshots showing completed and pending onboarding tasks
- Gets nudges for upcoming onboarding milestones and deadlines
- Manager monitors onboarding progress through automated updates
- Is alerted to incomplete onboarding steps for their team member, with recommended actions
- Receives reminders for key onboarding milestones and deadlines

Customer-driven innovation

Expected throughout 2026

HR Portal enhancements

HR Copilot for Configuration
Simplify setup for HCM forms and Internal Comms for faster, smarter configuration

HR Copilot for Transactions
Automate new hires, rehires, working pattern changes, cutting manual steps and accelerating HR workflows

Dynamic People Management
Flexible, role-based workflows with intelligent approvals for managers and HR

Data Privacy & Compliance
Streamlined controls and automated data retention rules for effortless compliance

Recruitment enhancements

AI Candidate Screening
Instant shortlisting & ranking means co-pilot does the heavy lifting

Enhanced Interview Scheduling
Multiple interview slots for fewer clicks and improved candidate experience

Recruit Lightning UI Upgrade
Modern SF Lightning interface for a seamless recruitment experience

Other key enhancements

Performance Management
Greater flexibility, clearer layouts, driven by customer feedback

Workforce Insights
Dynamic, configurable dashboards powered by CRMA Plus

Compensation Planning
Enhanced flexibility for HR admins and line managers

Time Off
Half-day holiday compliance + multi-file attachments

Forms Upgrade
Lightning-based UI with branding options for HCM & Recruit Forms

Commitment to Ethical AI

Sage People exemplifies ethical AI in action

Built on Salesforce, the world's leading enterprise platform, Sage People inherits the platforms security, scale and availability

Built-in security architecture
The Salesforce Einstein Trust Layer ensures data privacy while supporting global HR operations with high-volume analytics

Zero Data Retention
Third-party LLMs (e.g., OpenAI) do not store prompts or outputs; no data is used for model training or retained after processing.

Dynamic Grounding with Secure Data Retrieval
AI prompts are enriched with Salesforce CRM data while maintaining role-based permissions and field-level security.

Data Masking for Privacy
Sensitive data (e.g., PII, PCI) is automatically detected and masked before sending prompts to LLMs, configurable by region and language.

Prompt Defense Against Hallucinations
Built-in policies reduce inaccurate or harmful outputs, improving reliability of generative AI responses.

Toxicity Scoring & Human Review
Every prompt and output is scanned for harmful content; outputs require human acceptance before sharing, with full audit trails logged.

Compliance & Ethical AI
Aligns with Salesforce's "Ethics by Design" principles and supports global privacy standards (GDPR, HIPAA, PCI-DSS).

Auditability & Transparency
Prompts, responses, and trust signals are logged in Data Cloud for compliance and governance reporting.
